

## WAYS TO RESPOND TO REASONS WITH WHICH YOU DISAGREE

### #esufestivalofspeaking

#### Show that there is not good evidence:

<b>There is not good evidence</b>	We disagree because there is no evidence that using a mobile phone is dangerous
<b>The evidence is not reliable</b>	We disagree because one person's story does not prove phones are dangerous
<b>There is other evidence</b>	We disagree because some studies actually show phones make people safer

#### Show that the reason is not a good one:

<b>Your reason is not important</b>	Phones do sometimes annoy people, but that is not important enough to ban them
<b>The reason is not relevant</b>	Phones do sometimes have cameras, but that is not relevant to banning them
<b>The reason is not logical</b>	It is unfair some people cant buy phones, but that's not a logical reason to ban them

#### Show that there are other issues to consider:

<b>There is another solution</b>	Instead of banning phones, an alternative would be to turn them off during lessons
<b>The problem is unavoidable</b>	If you ban phones, people will just spend money on other electronic gadgets
<b>This is unfair or immoral</b>	People should be free to purchase phones if they want to, even if they are dangerous
